

**Moving your cargo
wherever,
whenever,
however
you need it to.**

Helicopters can fly, but not across oceans. So when these fire-fighting Chinooks needed to get to the other side of the Pacific, we made it happen. With the highest level of professional care, we arranged for them to be dismantled, crated, protected, loaded, discharged and reassembled so they could take off on their mission. And when they were done, we got them back home.

Imagine what we can do to tackle your unique needs. Give us a call and let's find out.
